

# Solenoids

## Series 66 Solenoid

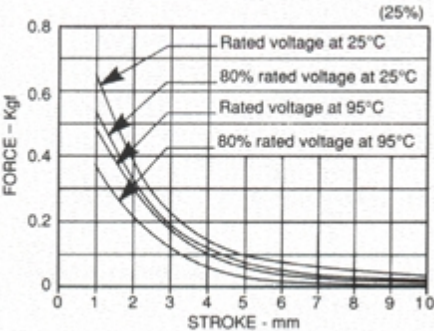

### GENERAL DESCRIPTION

- DC direct acting
- Miniature
- High force/stroke ratio
- Low cost
- Thrust types available

### PERFORMANCE

Electrical	ITEM	SPECIFICATION
	Closed power (continuous rating)	3W
	Maximum permissible voltage	240V DC
	Dielectric strength	500V RMS 50Hz
Mechanical	Insulation	All coils tested to frame at 500V RMS 50Hz
	Weight	Total: 35g. approx.                      Plunger: 6.5g
	Operating temperature	-5°C to +55°C
	Ambient temperature	The information given on this page is based on a room temperature of 20°C allowing for a nominal 75°C temperature rise in the coil.
	Force/stroke curves	These force curves show average performance only. In addition to normal manufacturing tolerances, deviations can be expected at some voltages due to the coil winding tolerances.

### FORCE/STROKE CURVES & ON TIMES

Maximum permissible coil temperature 130°

# DIMENSIONS (mm)

Push type - shown energised

Pull type - shown energised

Our products are designed, manufactured and tested to ISO 9001 quality standards. Some of them are capable of being operated by and capable of switching high voltages and/or currents. Care must therefore be exercised in the installation, protection and use of such products. If in doubt please contact your supplier or BLP Engineering Department immediately.
